

Ephraïm KOLO

Newly graduated engineer

ABOUT ME

Are you looking for an engineer with a good grounding in control theory, signal processing, applied mathematics, automation, automotive, aeronautics, aerospace ?

I happen to be qualified in these fields and I'm looking for a company to start my career. My adaptability and ability to manage priorities will enable me to respond effectively to the tasks entrusted to me. I also have cross-disciplinary skills in electronics, and remain proactive in my search for experience.

The word that best describes me is "optimization". It perfectly expresses my mindset. I like things well done, and I spare no effort to achieve my goals. "

Football
Tennis
Guitare
Piano

EDUCATION

2021-2023

Complex systems engineering

UNIVERSITY · Bordeaux 1

Modeling, optimization, control, signal processing signal processing

DEGREES

1720

Master's degree in control engineering

UNIVERSITY · Bordeaux 1

PROGRAMMING AND CODING

MATLAB/SIMULINK

C/C++

python

PSIM/Proteus

PLC

LABVIEW

EXPERIENCES

02-05/2022

Office assistant

ENSEIRB-MATMECA · Bordeaux

I was in charge of logistics for a summer school attended by students from Australia, South Korea and China, and of updating the department's Excel database.

2020-2023

Tutor

ACADOMIA/COMPLÉTUDE/ANACOURS · Bordeaux

Follow-up in math and physics for 10th, 11th and 12th grade, associate degree students.

01-03/2022

Academic project

UNIVERSITÉ DE BORDEAUX · Bordeaux

Optimal filtering of signals from continuous glucose monitors meters (CGM) used by diabetics.

01-03/2022

End-of-studies internship

IMS-LAB / BEYOND THE SEA® · Bordeaux

Modeling and control of a tethered kite in dynamic flight for ship towing.
